Spark Plug Wire Puller with Unique Grounding Lead

NEVER GET SHOCKED AGAIN!

ORDER NO.	PRICE
CDI 5519765	\$42.95

Universal Compression Tester

This well built compression tester comes with a steel braided flex hose, while lesser quality testers come with rubber flex hose.

- Ideal for "long reach" cylinder heads on any engine
- Side mount release valve for repeat testing
- Includes 6" straight and 13" flexible hose with 14/18 mm adapter
- Quick connect coupler makes tester fast & easy-to-use

ORDER NO.	PRICE
ESI 702	\$32.68

Piercing Probe Set

No need to disconnect harness or wires. Fully insulated probes have a spring loaded clamp with tiny stainless steel pin that self centers and punctures the insulation. (Hole normally reseal itself when the wire heats up.) Ideal for taking DVA readings on all engines and Jet Drive system. This set is highly recommended for use with all meters peak reading adapters.

Amphenol pins

CDI 5531469 – (20 pcs/ea bag). Replaces OMC 511469 (male)
 CDI 9731656 – Amphenol pins (20 pcs/ea bag).
 Replaces OMC 581656 (female)

ORDER NO.	PRICE
CDI 9731469	\$12.00
CDI 9731656	\$16.00

Smart Washer Parts Washer

The patented SmartWasher is the premier aqueous-based, bioremediating parts washer. The SmartWasher is a rugged machine which uses bioremediation, specialized mats, and a highly effective aqueous-based degreasing fluid (OzzyJuice) to clean dirty parts. Unlike traditional parts cleaners, the SmartWasher doesn't use harsh chemicals to scrub away greasy residue. The SmartWasher Kit comes completely assembled and includes 25 gallons of degreasing solution (OzzyJuice) and 1 fluid activation mat (OzzyMat).

Features of the SmartWasher:

- Flexible Faucet — Bendable design allows users to shoot fluid stream directly at grimy parts.
- Flow-Through Brush — Scrub away stubborn grease problems with the durable brush.
- Impact-Resistant Construction — Molded from plastic specifically designed to work with our powerful blend of microbes and OzzyJuice, our parts washing system can hold a 550 lb. load and stands up to heavy use.
- OzzyMat — Disposable, microbe-impregnated mat traps particulate matter down to 50 microns in size. When combined with OzzyJuice, Ozzyz are activated and released into the system.
- Pump Control Timer — Economical timer saves money by turning off fluid flow after a set time.
- Recirculating Pump — Sump action recirculates system fluid and microbes through machine.
- Industrial Heater — Built-in heater keeps fluid at a comfortable 105° F.
- Over Temperature Protection — When the "Low Fluid" / "Add OzzyJuice" light comes on, the heater automatically shuts off.
- Toggle Switch — Turns the pump on and off and is on a ten minute timer.
- Air Operated Brush — With extra long hose.
- Dolly — for mobility
- MultiLayer OzzyMat — Has multiple layers so you can remove layers as they get clogged.

Ozzy Juice

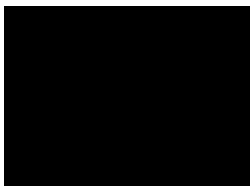

Ozzy Juice is gentle enough to use as a hand cleaner, yet can clean even your grimmest parts. In fact, in field tests under actual working conditions, Ozzy Juice has consistently been rated equal to or better than traditional, potentially hazardous cleaners. Ozzy Juice is a PH-neutral mixture of emulsifiers and surfactants that contains very low volatile organic compounds (VOCs), phosphates, formaldehyde, biocides or solvents. This mixture is blended in a liquid form to produce a biodegradable, nontoxic, noncaustic and nonhazardous oil dispersant and degreaser.
