Small Batch Epoxy Scale

Configured especially for measuring small amounts of epoxy. It allows the accurate dispensing of as little as a few drops of product for small projects, to as much as 4 fluid ounces of epoxy when calculating additive percentages and can be used to check the accuracy of dispensing pumps. This digital, pre-calibrated, 0.1 to 150 gram scale comes with isolated batteries installed and a full two year limited warranty. Structured within a sturdy 5 x 3 x 3/4 inch case, this go-anywhere unit fits nicely into shirt or jacket pocket.
